PROFILE

Software Engineering student (7th semester) at Universidad Peruana de Ciencias Aplicadas (UPC). Full Stack Developer with experience designing scalable and secure web solutions. Strong background in financial simulation systems, real-time monitoring platforms, and cloud-based deployments. Hands-on experience with Spring Boot, Angular, Vue, .NET, Django, and AWS infrastructure. Interested in Software Architecture, Cybersecurity, and DevSecOps practices.

EDUCATION

Universidad Peruana de Ciencias Aplicadas (UPC) – Lima, Peru
Bachelor's Degree in Software Engineering
March 2022 – December 2027 (Expected)
Academic Progress: 59.5% | Currently in 7th semester

TECHNICAL SKILLS

Programming Languages:
Java, C#, JavaScript, Python (Django), Kotlin

Frameworks & Technologies:
Spring Boot, Angular, Vue.js, .NET Core, Flutter

Cloud & DevOps:
AWS, Jenkins, Docker, Git, GitHub

Databases:
MySQL, PostgreSQL, MongoDB, SQL Server

Specializations:
REST Architecture, JWT Implementation, Algorithm Simulation, Secure Backend Design

---

PROJECT EXPERIENCE

Real Estate Financial Simulation Platform (In Development – 80%)

- Designed a financial simulation system for real estate companies, enabling clients to estimate property costs based on banking rates and financial variables.
- Developed frontend components and implemented financial simulation logic.
- Responsible for final system deployment in AWS (upcoming).
  Technologies: Angular, Spring Boot, Java, MySQL, AWS

EMSafe – Electromagnetic Load Monitoring System

GitHub: https://github.com/EMSafeUPC

- Built a data visualization platform to simulate and analyze electromagnetic load from home appliances.
- Prepared backend for future IoT sensor integration.
- Deployed backend services in AWS.
  Technologies: Angular, Spring Boot, AWS, Git

RingenSoft – Fishing Route Optimization System

GitHub: https://github.com/RingenSoft

- Developed an intelligent system to optimize navigation routes for the fishing industry using algorithmic analysis.
- Implemented backend logic for anchovy bank detection and route efficiency.
  Technologies: Django (Python), Angular, MySQL

Report-Service-Platform – University Talent Connector

GitHub: https://github.com/Aplicaciones-WEB-Report

- Developed a platform connecting university students with recruiters for internships and job opportunities.

- Led backend deployment and contributed to full stack development.
  Technologies: Vue.js, .NET Core (C#), SQL Server, Cloud Deployment

---

T-Compro – Retail Digitalization App

- Mobile application aimed at digitizing small local grocery stores.
- Developed administrative module for store owners, including inventory and sales management.
  Technologies: Kotlin, Flutter, Firebase

CERTIFICATIONS

- Google IT Support Professional Certificate – Google / Coursera
- IT Security: Defense Against the Digital Dark Arts – Google
- Cloud Security Basics – University of Minnesota
- Scrum Foundation Professional Certificate – Scrum.org

PROFESSIONAL INTERESTS

- Cybersecurity & DevSecOps
- Secure Software Architecture
- Scalable Financial Systems
- Cloud Infrastructure & Automation
